10-11-7.3. Hours of operation for ~~a~~-sawmills and commercial firewood processors shall be limited to 6:00 a.m. to 9:00 p.m. on weekdays and 9:00 a.m. to 9:00 p.m. on weekends.

10-11-7.4. No sawdust, slabs or shavings shall be deposited any closer than 200 feet of any public road and sawdust or wood chip piles shall not exceed 25 feet in height.

10-11-7.5. The site shall be screened to ensure a minimal visual impact on adjacent uses, including but not limited to, fencing, preservation of existing vegetation, and additional vegetation.

Addition to Article 12. Definitions:

Commercial Firewood Processor - An operation used for the purpose of processing felled trees and timber delivered from off-site locations into firewood with the intent to sell to others. Operations may include cutting, splitting, drying and bundling of wood and may include pertinent delivery, loading, processing and storage areas for raw materials and/or finished wood products. This definition shall not include the processing of trees into firewood on the lot or parcel where they were grown.
